

## **We hope you enjoy your Bolon Area Rug. Here are a few words about keeping it looking great.**

**Reverse rolling.** We recommend 'reverse rolling' your Bolon if it does not lay flat immediately. Simply roll it up the opposite way it was rolled in shipping and store for 48-72 hours to help it lay perfectly flat.

**Breezy installation.** Bolon has excellent dimensional stability (very little shift, stretch, etc.). Use 'rug gripper' for a smooth look and to protect wood floors. Bolon frays very minimally when cut (yarns that show may melt with flame if needed.) For a permanent installation, have a professional in-stall with standard vinyl adhesive.

**Maintenance.** Bolon is easy to clean and maintain. Dry dirt lifts easily with a standard vacuum cleaner. Mud, stains, and liquids can all be removed with a wet mop; the most stubborn stains are removed with a neutral cleaning agent and a brush. Regular maintenance is similar to that of carpet - use a scrubber dryer machine with soft rotating brushes or spray extraction machine with warm water.

**Durable.** Designed for demanding commercial applications, Bolon is an extremely durable product.

**Slip resistance.** Bolon is a safe surface with a coefficient of friction of 0.7. This translates to a very slip-resistant floor without too much friction. Using 'rug gripper' strategically will also help prevent any slippage between Bolon and the permanent floor.

**Waterproof.** Bolon is waterproof - even if flooded with water, moisture can penetrate the product to the floor. Thus the weave structure that is visible is comfortable underfoot but not permeable. (Any seams must be seam-sealed to be waterproof.) Vinyl is naturally chemical- and bacteria-resistant, making it a great choice for places where bare feet will tread.

Finally, Bolon is kid- and pet-friendly. Your Bolon contains **no lead**, no heavy metals, no tin. Bolon is free of all three.

**Warranty.** Area rugs are warranted against defects in seams or binding for up to one (1) year after delivery. Straight cuts and rolls of Bolon carry a 5 year replacement warranty. Both warranties have the following exclusions: outdoor installations; normal wear and tear; improper installation; misuse or abuse by the end user; physical damage to the product as a result of unreasonable use or negligence. In addition, binding dye lots cannot be guaranteed from sample swatch to finished product.
